SMART-Seq® v4 Reagent Kit for the SMARTer™ Apollo™ System

Catalog No. 640170

Amount 96 rxns

Lot Number Specified on product label.

Description
The SMART-Seq v4 Reagent Kit for the SMARTer Apollo System is part of the fourth generation of SMARTer® Ultra® Low products used to generate high-quality cDNA from ultra-low amounts of total RNA, or directly from 1–1,000 intact cells. The components of the kit are specially formulated for automation on the SMARTer Apollo platform. The kit is tested with 10-pg inputs of total RNA, and has been shown to perform robust cDNA synthesis from one cell (equivalent to 10 pg of total RNA), yielding data with the highest sensitivity compared to previous generations. This kit incorporates locked nucleic acid (LNA) technology and improves on the SMART-Seq2 method. cDNA libraries generated with this kit have been tested for compatibility with Illumina® sequencing platforms. SMART® technology offers unparalleled sensitivity and unbiased amplification of cDNA transcripts. Most importantly, SMART technology enriches for full-length transcripts and maintains the true representation of mRNA from the original sample, critical factors for transcriptome sequencing and gene expression analysis.

Package Contents

Package 1:
640170 (96 rxns)
5 µl Control Total RNA (1 µg/µl)

Package 2:
640170 (96 rxns)
1.85 ml Lysis 1
350 µl Lysis 2
150 µl RT 1
600 µl RT 2
300 µl RT 3
135 µl PCR 1
200 µl PCR 2
4 x 1.25 ml PCR 3
240 µl RI
2 x 6.8 ml EB
4 ml NFW

Storage Conditions
- Store Control Total RNA at –70°C.
- Store Lysis 1 at –20°C. Once thawed, Lysis 1 can be stored at 4°C.
- Store EB at –20°C. Once thawed, EB can be stored at room temperature.
- Store all other reagents at –20°C.
Certificate of Analysis

SMART-Seq v4 Reagent Kit for the SMARTer Apollo System

Shelf Life
- 1 year from date of receipt under proper storage conditions.

Shipping Conditions
- Dry ice (–70°C)

Product Documents
Documents for our products are available for download at takarabio.com/manuals
The following documents apply to this product:
- SMART-Seq v4 Reagent Kit for the SMARTer Apollo System User Manual

Quality Control Data
A sample kit from each lot was manually tested as follows: 10 pg of Control Total RNA was subjected to the manual equivalent of the first-strand cDNA synthesis protocol described in the SMART-Seq v4 Reagent Kit for the SMARTer Apollo System User Manual. The first-strand cDNA was then used as template for PCR using 17 cycles. PCR products were purified with an Agencourt AMPure XP Kit (Beckman Coulter, Part No. A63880 or A63881), and resuspended in 17 μl of EB. 1 μl of the PCR reaction was analyzed with an Agilent 2100 Bioanalyzer and a High Sensitivity DNA Kit (Agilent, Cat. No. 5067-4626). The resultant analysis indicated the cDNA size range was approximately 300 bp to 10,000 bp. A peak was manually integrated from 300 bp to 9,000 bp. To calculate the total cDNA output, the concentration, defined by Bioanalyzer software, was multiplied by 17 μl. Outputs ranged from 3.4–17 ng.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.

NOTICE TO PURCHASER:

Our products are to be used for research purposes only. They may not be used for any other purpose, including, but not limited to, use in drugs, in vitro diagnostic purposes, therapeutics, or in humans. Our products may not be transferred to third parties, resold, modified for resale, or used to manufacture commercial products or to provide a service to third parties without prior written approval of Takara Bio USA, Inc.

Your use of this product is also subject to compliance with the licensing requirements listed below and described on the product’s web page at http://www.takarabio.com. It is your responsibility to review, understand and adhere to any restrictions imposed by these statements.

STATEMENT 271

For Research Use Only. Not for diagnostics. Not for use in diagnostic procedures. Product is covered by patents and patent applications owned by Exiqon A/S.

STATEMENT 275

SMART-Seq2 Technology. This product is sold under exclusive license from Ludwig Institute of Cancer Research, Ltd. and is covered by pending U.S. patent application. For license information, please contact a Takara Bio USA, Inc. licensing representative by phone at 650.919.7320 or by e-mail at licensing@takarabio.com.
